CONTINUING PODIATRIC MEDICAL EDUCATION (CPME) AND ASSISTANTS CONFERENCE

September 11-12 @ Zermatt Resort in Midway, Utah

SPEAKERS

Richard L. Williams, PhD *Critical Thinking and Decision Making*

Have you ever wondered why you choose to make certain decisions? How does your thinking influence those choices and could you improve upon those processes to become a better doctor? This year, we welcome back Dr. Williams, an organizational psychologist, to discuss how critical thinking can improve our decision making skills. He brings over 40 years of real-world experience working with some of the largest organizations and high-profile government institutions. Don't miss this riveting presentation.

Jackie Coult, CHBC *Documentation and Reimbursement for Pod Testing,
Reimbursement for Off-Weighting the Diabetic Foot,
Wound Care Documentation and Reimbursement*

Face it, we all want to deliver the best possible care to our patients but getting paid to do so is a constant struggle. Jackie Coult is a senior healthcare consultant for EideBailly, one of the largest accounting and professional services organizations in the country. She has decades of experience working as a business and healthcare consultant to a wide spectrum of hospitals and medical practices. She will present how to document and get paid for delivering healthcare.

Mark Oliver, M.D. *COVID-19 and Diabetic Foot Infections*

The world has permanently changed, for better or worse, as a result of COVID-19. This year we are honored to hear from Dr. Oliver, an infectious disease specialist, as he discusses the COVID-19 as well as providing us with an update on diabetic foot infections. Dr. Oliver has over 31 years of experience in the medical field and is a graduate of George Washington University School of Medicine.

Aaron Frodsham, M.D. *The Pathophysiology of Atherosclerosis,
Clinical Examination and Testing of PAD*

Moving beyond the basics of peripheral arterial disease, Dr. Frodsham will provide listeners with a nuanced understanding of the the pathophysiology of atherosclerosis. Just as important as understanding the disease is implementing effective testing protocols in the clinical setting. Dr. Frodsham will provide attendees with an evidence-based approach to PAD testing. Dr. Frodsham is an interventional radiologist with a background in academia at the University of Utah. He is currently in private practice in Holladay, Utah.

Brady Mallory, D.P.M. *A Fresh Perspective on Flat Foot Reconstruction*

Dr. Mallory brings a unique approach to clinical and surgical treatment of pes planovalgus deformity. He graduated from Kent State and completed a surgical residency at the University of Pittsburgh. After spending time in private practice in Texas, he now works at the Veterans Hospital in Salt Lake City and is heavily involved in residency training.

Lindsay Roper, D.P.T. *Role of Physical Therapy in Pain Management*

Chronic pain is a hexing problem for many of our patients. It afflicts them in ways we may not fully comprehend and a multi-modal approach is key to providing effective healthcare. Dr. Roper will discuss the role of physical therapy in treating pain and how we can more fully utilize this important tool in the delivery of care to our patients. Dr. Roper has been working as a therapist for 13 years and currently specializes in treating patients involved in a pain management service.
